first one is apocalypse tank style from Red Aler 2 (but its still a mammoth lmao...)

second one is original Red Alert 1 soviet mammoth tank

p.s. these tanks from "Renegade: A Path Beyond"... I just convert them into Renegade and add some nice effects

There is no 'Radar' on the Ref. It's the Communication Center behind the Ref.

That Mammy is my work for Red Alert A Path Beyond (i'm their staff, and coder of Launcher).

And I DO NOT allow to Scrin use my work in any others mod wothout my permission!!! And i tell him.. but.. Scrin you steal my work!
You are bastard who cant make models like this from scratch, but always get assets from others authors and tell to everyone - I"M AUTHOR! Go to HELL Scrin!

P.S. Model for APB can be downloaded here
Download Soviet Epic Mammoth Tank (~1,57 Mb)

Also. Model sources can be getted by direct request to author (me!)

Errr, might want to check that again, it points to:
http://www.renegadeforums.com/%22http://cncrussia.ru/downloads.html?func=fileinf o&id=21%22
remove the http://www.renegadeforums.com/%22 & %22 at the end and then link will work.
