Thinking about releasing this Water + Water Tutorial, yes its moving water and it has Reflections that move also.

I created it because the "Realistic Water Tutorial" on RenHelp doesnt really look good

Check it out:

---

Do it then

Although the water needs to be a little more opaque, so it looks deeper. =P

Could you add smoke emmitters where the water fall hits the lower river? That way, it would look like the water clouds on the bottom of waterfalls. That would be epicer.

Seriously. I don't like every single concept, prototype and test I once made spammed online for e-penis purposes.

Only when something is properly finished I'd like to see it online. Partly to prevent false hopes and anticipation.

That's very nice, it sort of looks like the water in RA3. The bunch of emitters in the well/drain/hole thing also adds a touch of coolness.
