Well no longer a boneing vehicle problem so much as a skining vehicle problem

Well i have spent the last 4-1/2 hours trying to skin this pos.. First i unwraped UVW's and i made a skin for them (first hour) then i put it on the car only to find its all screwed up around the seams...

So i ditched the skin and spent the last prevoiuse hours trying to fix this problem, i look up UVW tutorials on google renhelp etc

Now is the time to ask for help i suppose..

How do i fix this:

grrrrr

Here is the skin i am useing:

(Ignore the black filled right bottem corner)

I have an easy solution for that.

If you use photoshop you should select the skin you have. Then go to 'Filter' -> Other -> Minimum...

Radius 2 would do the job
