I think it looks awesome, but u need to start adding fewer textures, you FPS will tell you once you have a lot of sbh's running around

Is it me or does it contain parts of other rifles compiled to make one rifle? That maybe would

explain the amount of textures too.

It would look alot better as a ramjet or 500 rifle.

If you're using ren weapons then simply convert the original texures to tga, don't rename them, skin the weapon in gmax, and put in data folder. It must work since the texture are loaded from always.dat ingame

thats a pointless comment.

did i say i can make models? no.

did i say i'm better than him/her? no.

did i say that i will make a model? no.

did i say i have a first model? no.

I stay with making lil skins k thnx bai.

Its a good model but I don't think it suits the Laser Rifle.
It would look better if it replaced a sniper rifle or something else like the Tib Auto rifle,

In my opinion there's no need for youtube videos, simply make some screen shots, it's a weapon not a entire map worth driving around and showing
