Hey, i'm modding C&C City and first i need to retexture the w3d in 3ds max. So i started doing that and i got stuck.

While i was texturing the road, i has to turn the texture. So, i didnt know how to because i'm not a texturer or anything like that.

Here is a pic of the situation.

sorry, screen resolution

you must UVW map the texture

you make that when you click gizmo while select the texture then you can play around with it

yes he is. he's a starter i think though

he aint even close to how good di3hardnl is lol
