Hey, i'm modding C&C City and first i need to retexture the w3d in 3ds max. So i started doing that and i got stuck.

While i was texturing the road, i has to turn the texture. So, i didnt know how to because i'm not a texturer or anything like that.

Here is a pic of the situation.

sorry, screen resolution

Material Editor - Standard_6

Material Navigation Options Utilities

The Material Editor window features a 4x6 grid of material preview spheres. Below the grid is a toolbar with icons for material operations. A dropdown menu shows 'Standard_6' and 'W3D'. The main area is divided into sections: 'Material Pass Count' (Current Pass Count: 1), 'Pass 1' (Vertex Material, Shader, Textures), 'Stage 0 Texture' (Map #56 (cc_road2.dds), Clamp U, Clamp V, No LOD, Display), and 'Stage 1 Texture (Detail Texture)' (None, Clamp U, Clamp V, No LOD, Display).

you must UVW map the texture

you make that when you click gizmo while select the texture then you can play around with it
