Well.. umm yea..

I really had no idea of what to search on to find what i was looking for..

For some months ago, i was playing renegade..
But i wasn't opening the game and going into the server list through renegade..

Someone send a program where i could join the servers with my desired nickname, without having to use a valid serial.

But i simply don't remember what this program was named..

I can't tell much about it,
only that you could change the background for the window to nod and GDI skin.

I hope someone knows what i am talking about

Thanks in advice =)

Gamespy is the most obvious one, renegade resurrection as well i think. The most simple one is still the WOL. I don't understand why people don't simply buy the game, it costs under 10 € anyway and buying it still helps it stay alive, IMO.

I don't want to buy it for the 3rd time
I accidently broke them all, i dunno how it happens.. ehh nvm..

Yea. It was renegade resurrection

Thanks alot for the fast reply =)
Great help!

If you still have your three valid serials, then you can install it from an iso and then use the valid serial to install.

Raven made this but never tried it.

The newest version of renlist supports chat and buddylists, along with an XWIS server viewer/launcher. You must have a valid nickname/password/serial to use it.

<http://renlist.n00b.hk/download/renlist.v1.0.3.zip>

And if you really bought it 3 times you must have at least also 3 valid serials. If you dont than you either got scammed or you never bought them
