I like a lot what you did with the map itself! The tunnels are nice as well. I really don't like the buildings: they just don't look right IMO, but they aren't yours and I suppose you didn't include them?

May I also note the advantage hud doesn't make you look good.

Nice, I'll try it out. Thanks.

Is there a reason why it isn't in a .mix?

then follow madrackzs rule

rename the orignal .mix file (exam. Canyon.mix) to Canyon2.mix
and save the edited map as Canyon.mix and put both .mix files in your data folder

some people see ALL skins as advantage skins. If you think he has that much of an advantage over just hitting the K key, then do the same to your hud. There all even now, your both lazy, no more advantage.

 Nice job crysis992.

Is it the one by JsxKeule called " [model replacement] sniper rifle"?

Also, thanks for the reply.

added: I was getting some very strange flickering on your site. Don't know if my computer didn't like it or what but might want to check that out.

Deathlink6.0 made a uber sniper rifle with a laser pointer and a silencer, look on his site.
