Hey, this is one of my oldest mods like first one and its very poorly made but i still think its really fun, so i posting here to have you try out I was very new to level edit and just playing around with some of the stuff but i really like this game haha its pretty fun. lots of weapon spawns and health and armor upgrades, basically all you wanna do is kill the enemy teams boss, gives uber points. you wanna have the most points at the end of the game, id say like make time limit 30-60 mins. also, a bot war in the middle, incase you do end up killing the boss, but it is pretty hard actually. enjoy and pm me if you wanna play haha

Haha i couldn't belive i found this  
i must have made this like 4 years ago lol!

By the way, it took me like 4 tries to make this topic so i kinda rushed through it because i had everything typed out neatly and everything and then i hit the Back button on accident, and then it said "web page expired" so i was kinda pist and just typed everything really quickly.
