I finally decided I should finish it and here it is. The black 500 sniper from the days Logan was in charge. I know there already was one but this one is fully boned and has an improved texture.

It contains also the reload animation and a powerupmodel!

I will release the gmax files lateron when I release a new version of the beta collection pack.

Hope you guys like it!

i really dont like what that sniper looks like

it looks like 2 rectangles with some weird texture in the first person pic

nonetheless good work

Thanks Reaver! I actually like this rifle a lot...I really don't mind it's model...

But I was using another Beta rifle made by jamiejrg sometime ago.

<http://renegadeskins.forumieren.de/sniper-rifles-f76/renegade-beta-sniperrifle-t 463.htm?>

It has a longer barrel and is advantage on tunnels since u can see the barrel sticking out...

So I will use yours instead now!

I know what you are saying Boofst0rm. Thing is this is the original design for that sniper rifle. I didnt want to wander away from the design.

<http://www.cnc-source.com/forums/index.php?app=gallery&module=images§ion=viewimage&img=4489>

I know the rifle that jamierg made though in my opinion it was to thin and had the wrong muzzle tip.
