To keep things consistent, we would like the winners of the matches to post a new topic with the following topic title format:
Jelly vs St0rm (Round 1)

The winners of the matches need to post screenshots with the scores of the maps they played and the building kills unless it was win by basekill. IRC logs from the RGCT channels are useful extra material.

Furthermore, I would like to remind everybody that the RGCT starts tomorrow (September 5th), which is also the deadline. So get your matches done tomorrow, people!

Let the games begin!

Scores only? A team can lose on points but win the match..
