This is my version of the beta chemsprayer. Although I have to admit the texturejob doesnt match the beta chemsprayer perfectly.
It includes a reload and powerup animation.

Feel free to comment. Also if you want to host it on your skins site please contact me first. (Since soon there will be an updated beta model pack so its useless to host this separate)

Also the gmax's will be supplied lateron in the Renegade beta pack.

For now enjoy! (The next thing to work on is the beta cinematic pistol)

EDIT: This zip does contain the powerupmodel!

I will speak you on msn about the Dreg!

Also I was thinking about redoing the handpositions but that would mean gdi and nod will get the same handmodel. Which I personnaly really dislike. I havent found an to redo a complete reloading animation and still have the gdi and nod hands. So if anyone knows that please say the solution
