I want to uninstall RenGaurd so I can download some really cool skins and also it always gives me trouble at start up. But last time I uninstalled it my game wouldn't work... it had something to do with game.exe file and i lost my disc so i had to do a system restore on my computer to fix it. can some1 help me?

Delete game.exe, rename game2.exe to game.exe

Or run the RG uninstaller thats in your ren folder, it will do the same thing
