LOL I just got a new computer and i used a USB Stick to transfer my Renegade FDS and The BRenBot 1.52 it worked fine out on my first PC but when i openend it on the other PC with the same settings it was opend in a few seconds after that there come som text but it goes really fast i can only see it have somthing to do with som INI Settings but it is configured like it was on the other PC and it worked out fine there! I dont know what to do so please help!

Run BRenBot from the command prompt so you can see what message it gives. You probably have an incorrect path in the config file.
