My cousins are dealing with this ea game that doesnt let them play in certain servers. They got their account locked/banned for playing in them. They did not cheat, didnt glitch or bug.

Whats with ea? they earn money and dont let them play some of the game? Huh? They cant even play single player because their account is banned. Wtf?

Discuss.

They have the right to ban, as it's a clear violation of the ToS, the best thing to do is not play the game until the ToS become fairer.

I totaly agree.

Lets face it, what game has EA assisted in creation that even the final version of was bug free. Moreover what game have they made that on its release had 0 bugs lol.

I bought Battle Field 2 on EA downloader and they only sent me one of the two CD keys I need. Upon researching I found that many other people have been screwed over just like me, and even after e-mailing them 5 times they never helped me, or anyone else that I read about.

HAHHAHHAHHAHHAHHAHHAHHAHHAH.

I would like this because then EA wouldn't release a single game, at least then some good company can take EA's place and get things right.

What the fuck are you guys always bashing EA for?

EA makes some of the best games ever. I love what they did to C&C they only made it better and more enjoyable.

Stop hating on EA I am tired of hearing it.

Just kidding. Fuck EA.

Ok hold up. EA is only horrible with the games that they develop themselves, there are many excellent games that EA simply publishes like Dead Space, The (old) Sims, Battlefield series, Mass Effect and Left 4 Dead.

This is true. Although I'm fucking pissed they aren't putting Dead Space 2 on PC.

I will admit the battlefield series are good games, but the fact still remains that when they try to fix one problem they make 10 more problems in the process.

Not true, they rush the development, and therefor make the game shittier than need be.

Unless your talking about the "meh" WII version (AKA DeadSpace Extraction):

(I preordered the game from gamestop months ago, so if they fuck me over at this point they'll never hear the end of it, plus that article is obviously out of date, either that or else EA even fails at keeping their website up-dated, because DeadSpace2 for PC is still a preorder option.

It is EA, so I am sure they will spend that time to port the game to PC, and then maybe worry about patching it, just like what they did with Bad Company 2.
