I decided to do my own nod blue buildings and i know this was done already just felt like doing my own one.

I changed the building running lights also the only ones that did not come out right were the pp and hon.

I also did interiors which i knew probably wouldn't be used.

I'm planning on maybe doing GDI buildings. I'll finish the character PT icons for GDI first.

If for whatever reason you like the Refinery Rising Door i believe i added that file to.

I will also change the ob laser colors when i figure out the file

Not bad, a simple replacement's always nice. But I suggest darkening the tone a bit to match Nod's darker-toned red.

^^ Did you hear what he said? He said that he knew that somebody had already made this before, he just wanted to remake it for himself. Actually, I like the lighter color blue. It is a good solid colour. The darker tones just look awful.

About the ob laser colour, I strictly remember a thread about half a year abo that talked about this. I could not find it in the search but I rember it is a .dds file with other stuff in it. Or actually you might have to change the color of the texture that has something to do with the ob crystal. Like ob_crystal.dds or something like that as I had said earlyer. But I just remember that is was really hard to change the color.

It's a value in objects.ddb
You can't play online with it modified to prevent cheaters.
Edit:

The G-Man wrote on Fri, 04 December 2009 09:46 ^^ Did you hear what he said? He said that he knew that somebody had already made this before, he just wanted to remake it for himself. Actually, I like the lighter color blue. It is a good solid colour. The darker tones just look awful.

There is a .dds file, but it's black and white, AND it also is the repair gun's .dds file, which also has a value in objects.ddb.

How about we just rename this forum into the "Hue/Saturation changes release center".

I'd rather that than "Flamboyant, blatant advantage skin release center".
