Did you installed as sated in the sticky???

If you installed with the first decade you actually only need to install scripts

And please dont PM randomly if you have a topic

i am new in this website
sorry
stick?
what is sticky?
my renegade is not firs decade
my renegade is only renegade
i don't have firs decade
pls open msn pls
i don't understand stick :S plsss
if my english is bad excuse me (i am not american or english)
please open the MSN

6. Install the core patches manually.
CP2: http://www.renegadeforums.com/index.php?t=msg&th=18892&start=0&rid=4 882
Cp1: http://download.renguard.com/standalone_cp1.zip (included in CP2 so no need to install it if you installed CP2)

Note: if you're running Windows Vista, then you may also need to run the core patch install file(s) in admin mode, as shown above.

Once core patch 2 is installed, you do not need to use your CD anymore as core patch 2 includes a no-cd crack. An error will occur when you load the game but you can click on 'cancel' to skip to the main menu Wink.

7. Download and install scripts 3, latest stable version which you can download here. I recommend you to uncheck 'bloom' in the setup. If you have a rather old PC, also uncheck 'shaders'.Attention: if you get a black screen when starting Renegade after installing these scripts, this probably means you don't have directx 9 which you can download here

8. Go and play Renegade.

Note: if you're running Windows Vista, then you may also need to run the core patches in admin mode, as shown above.

You'll need to log in with your nick and password once, then restart Renegade (and Renguard) before Renguard will work. If you don't have a login yet, you can simply log in with the nickname of your choice and a password of exactly 8 letters or numbers. If it isn't taken, it will get registered to you. If it is taken, you will get an empty server list.

i don't understand them :S
my english is not enough :S

Lol i cant tell it any easier then that sorry

Maybe you could try google translate to translate it to your language?

Topic starter doesn't need any scripts: he's playing single player!

At topic starter: your question isn't clear at all.

I think he's saying he can't buy any orcas, apaches, or transports in multiplayer practice, this is of course because they are not available on that map, you have to play a map with _flying in it to get them.

PS. What language do you speak? Maybe we can get someone that speaks your language to help you.

The flying vehicles are not available in Multiplayer Practice.

What language do you speak?

i speak turkish. of course i am turkish
there isn't any plane at multiplayer pratice
where can i get in apache, vorca etc.
i installed 1.307 (i can make a mistake)
can i get in plane(apache vorca etc.) at singleplayer
if i can't get in plane(apache vorca etc.) at singleplayer
what can i get in plane(apache vorca etc.)
can you add to your msn list me? duhan_45@hotmail.com
thank you very much

Unfortunately, even with This, there isn't a flying map.
