I thought I has seen soome SS of the lights on tanks actually having emitters. I looked at renegadehelp.net but wasn't finding anything that healped (prolly didn't know what I was looking at if I did).

Is there a way to do this, or am I just thinking I seen this?

you can adjust the settings but it will always get bigger from far away you can attach a emitter to the tanks but wont be able to use it online.
