We've already addressed this problem.

Locked.

Look: That patch doesn't work. Your best chance is to try online, or to go to "Multiplayer LAN" and make a game for 1 player only, then you can change the map to, say, City_Flying.mix and you will be able to buy apahces/orcas.

It is not (easily) possible to get the AI bots to work on most maps, and I would strongly recommend trying the game online.

Also, the apache/orca physics are nothing special, if you're looking for a decent flying experience, you're wasting your time. If you want practice with apahce/orca, then simply play online.

um rename the map you want to play to Skirmish00, but copy the one that is in your data folder named that, just incase you ever want to play it again.
