here is a pic of what i'm talking about but when i going the game by my self i can't see them?, now is that because i'm hosting it and when i put it on a server other people will see them?

i'm making it a mix map.

There should be a set visible checkbox in the box's preset options. Check that to visible and it should work.

Why don'y you get the .lvl file of the map and add some textured walls threw gmax as separate w3ds than those ugly boxes? maybe not the best suggestion tho

not to double post but when i uncheck that i still can't see them?

am i supost to temp them?

if that don't work i will probly go make a nice looking box in renx.
