I don't expect a whole lot of people here to love this theme, but I am about to change my Renegade again... so I figured I'd post this here to make sure it is out there just in case.

John Deere GDI tanks

Remember this skin pack was made for fun and lols, not claiming it to be professional grade artwork.

Edit: Added a couple files to the zip that I missed.

I actually didn't notice that myself untill I posted the SS on here. I may have forgotten or done it  
but didn't like, I can't remember. The hummer looks good (imo, ofcourse ) and has plenty of  
yellow on it. The SS doesn't show them aswell as I would have liked but I had already taken it a  
while back.

Lol, hope that didn't sound negative. I still want to use my current skins, but these ones look great (and unique).

No, I didn't take that in a negative way at all. I would prolly use Dreg's C&C 3 skins, but I like to challenge myself to come up with new ideas and keep my Renegade different.

After I made these tanks, I started to make Catepillar theme for Nod... but it just didn't work. I couldn't come up with any ideas for a while, but then I found some inspiration. Now I am working on a complete Luthorcorp Nod theme, it is fitting in my head at least. I have only finished the stank though, because I can't stop watching Smallville, lols.

You could say that, but I like to think it was more effort and thought than some of the shit people try to pass for skins.

Also...

It's a bit more than a recolor. He managed to color certain parts of the tanks different than others (which requires knowhow of the dds file) and added logos that blend well (again, knowhow required).

Well I must be mentally challenged, because I liked... actually I must be really reall retarded as I am the one that made it. I didn't make this because I thought everyone that plays Renegade would love it so much and use it forever. I made it for myself, then when I was about to make some new GDI tanks I thought I could post it here for 2 reasons: 1. Maybe someone else will find enjoyment using it. 2. If I ever need to find it again for whatever reason, I know that it is here.

So thank you for your opinion anyways, next time maybe try not to sound like such a douchebag though.

Don't mind him, he's a douchebag that uses std::

I like it :3

I lol'd he has the right to an opinion

I think Carrier is talking about SK's way of expressing his opinion in such a manner in more than just this thread...

I don't mind people not liking my skins, they don't have to use them... I don't like when people think they have to go into douche mode to express their dislike. It is not necessary. I don't make skins for others, I make them for myself.

Bottom line, if you don't like don't use, no need to be a asshat.

In all fairness though, when you post skins on renforums, you're going to get negative comments in some form or another; it's pretty much inevitable.

However, I feel like if you're going to be an asshat about someone's work, do so while saying WHY it's shit.
