i have porblems with my level editor if i klick at exe the start window comes then comes a mistake calls (the programm has find a mistake should it be send or not) and i need it^^.

i have

windows XP

i have look into regestry if pathes are right

i have reinstall it 3 times

i have repair it 2 times

and that all happend after i searched through it and test the editor. since this time is the mistake

the file is in german but i hope anyynone can help now i have one with the english text here^^

Make sure you have Renegade installed on the same hard drive you have level edit installed on. For some reason It wouldn't work with me before when I had it set up on different drives.
