Basically because of a few request i have flipped the normal starcraft cursor to the action cursor...
Apparently they got annoyed cause they would point at one server and it would select another. No
screenshots cause my screenshot program is not working right so if someone has an issue with
there being no screenshots can someone get them for me?

Print Screen. It'll send a screen shot right to your data directory.

have you moved the location of your westwood folder since you've installed the game?

You can at least paste it into MS Paint or download Gimp.

I've done this once before but 2 things are better
1- Better Quality (sort of)
2- Switched to make easier to use
