Hi,

I just reinstalled Renegade after a long time... and all the installation went fine. But when I click on advance game listing to choose a server it search for a long time and time out.. Like if I couldn't connect.

thanks

Snip

ok it is most likely do to the xwis server change.

make sure renegade is closed.

go into the renegade registry and delete the following key folders:

Renegade>BandTest
Renegade>WOLSettings>Servers

reopen renegade and log back in.

tell me if that works.

Also check your hosts file (typically C:\Windows\System32\Etc\Hosts).

It works now. I don't know why tho..

Thanks everyone

Could have been a DNS caching issue to do with the server changeover...
