Hey

I was wondering if anyone had the Tiberian Dawn models of the harvesters that work online and if they were willing to release them.

I know that Di3hardNL made the harvester for Nod and it works online.

Thanks

I could do it, but I don't want to piss any number of people off with the release.

Also, the texture wasn't so great, so it may be better for Di3 to just make a new texture for it, if he feels like it.
