hi,  
I've rent a ren server from BlackIntel  
after i put LuaPlaugin.dll in the Plugin section on ssgm.ini  
the server crash after each ended map

all versions crash the server except for version 1

i can't understand the crashdump file  
maybe someone of you can

EDIT:  
[Version]  
SSGM=2.0.2  
Scripts=3.4.1  
BHS=3.4
