I would like a map like this made. I was gonna do it myself (or try it at least)
but the stupid World Builder wont run under windows 7

Is there anyone with the zkillz to do it? Would be awesome!!
The little green squares are Player Starts.. 3 at bottom for PLAYERS
and 5 at top for Brutal AI
I also like to have Oxi's no-superweapon fix applied to it so
there are no nukes or ions available:

Please PM me if you want to do this

We'll advertise the map on all our sites and of course you get
full credit in the readme's and stuff and it will be placed on
our cnc3 section of game-maps: http://cnc3.game-maps.net

This is wierd, consideing Generals has world builder and that works on my Win7.
Is the CnC3 intergrated with your CnC or does it have its own .exe ? if it does try uninstalling it
then reinstall it, besure its stable enough to run or things can turn worse.

The Installer is the problem, it doesn't detect my game installation at all and tells me to install CnC3 and try again lol

Check the registry (regedit) to make sure you have an installation key for C&C 3.

The key location is: HKEY_CURRENT_USER > Software > Electronic Arts > Electronic Arts > Command and Conquer 3

Obviously.

Saying this, i do not actually have worldbuilder installed, but i've read up that these keys are required and also the MOD SDK is required.

In 64bit Windows, your C&C 3 registry or anything that is natively 32bit will be inside the Wow6432Node key which is found under Software instead of just being in Software.

If I recall it worked fine on mine (Windows 7 x64), so I can't imagine what's wrong here.

I guess I'll have a go at this, is this for C&C3 or Kane's Wrath?

Winter1991 made it today, he just gave it to me
But, feel free to make it yourself too if you want to, i will place it
on the site as well..

Download

Unlike the mapname says this map was made by Winter1991 from st0rm.
It is a large map with no obstacles so you can have bigass wars going on.
Tiberium Spikes are present and EMP are present.
