I was going to post on the issue but found this instead... oddly enough it works... but now i am curious if anyone can tell me ideas of why it works
StarCraft Color Problems

Yes, opening it in background does not do anything.

Yes, opening it in background does not do anything.
I guess it would make sense if it didnt work for ALL computers, theres a comment about it not working if i remember correctly didnt read to see if it was answered

WOW, I actually got it to work for the very first time. It has never worked before.

It seems that it works only sometimes.

Ive had it work without the screen resolution thing before. and it doesnt really effect in game aside from the water so i dont see why it would be a major issue
