Why did AVG delete my gta_sa.exe as soon as I updated it?

I forgot edit my post awhile ago.

AVG confirmed that it was a false and it was sorted in the next update. May aswell delete this or lock it for all I care.
Also how can I have have gta_sa.exe in the whitelist if AVG removed it in the first place? LOL

Use a different Anti-Virus and you won't get these problems.
Microsoft Security Essentials ftw!

AVG has a LONG history of false positives.

If you want a paid Anti-Virus, Nod32 is the way to go.

Thanks a bunch!
AVG also lied to me, saying the false positive was fixed in the updates. >:[
