I don't know if this is actually an issue with renegade.
I run Windows 7
I have an issue of not being able to take screenshots (such as Purchase Terminal or Main Screen
Background) it just takes a screenshot of the background or what is below renegades window.
Can anything be done about this?

Edit: i have attempted a screenshot utility

This is normal. You'll just have to paste the shot into Paint or The GIMP or another image editor.

Knew i was forgetting to add something. when i do it just pastes the under window or windows
background

Ex:
the in game taken screenshot is

the windows or screenshot utility's screenshot is

File Attachments
1) ScreenShot60.png, downloaded 476 times

2) Untitled.png, downloaded 474 times

So... whats wrong with using whatever method you used to produce the first screenshot?

Well it is a known issue with Win7 and Scripts 3.4.4, you will have to wait for Scripts 4.0 to be released as it contains improvements to the screenshot code to work properly in Windows Vista and 7.

If Renegade is installed to Program Files then you have to run it as admin otherwise it doesnt have permission to create the screenshot files.

Try pressing alt + printsreen when you take screen shot then paste it in paint. If your playing renegade in window mode you have to use the alt + printscreen to capture that single window.

danpaul88 wrote on Sun, 27 March 2011 14:45Well it is a known issue with Win7 and Scripts 3.4.4

I don't have a problem with win 7 and scripts 3.4.4 when taking screen shots?

Just printscreen, that already saves the pic to clipboard unless you have modified your copy of windows to work differently or something.
