Hey,

I wanna start again my Renegade Server.
Everytime i "quit" the fds it crashes and freeze.

"Microsoft Visual C++ Runtime Library

Runtime Error!
Program E:\Network\Renegade\No-Reload\Server.dat

This application has requested the Runtime to terminate in a unusual way.
Please contact the application's support team for more information."

Running it with latest scripts, Renegade Resurrection.
Only loaded BRCommands.dll for Brenbot 1.6

Server OS: Windows Webserver 2008 R2 (24 gb ram)

I have no idea why its crashing.
Already tried to load it without the BRCommands.dll, without my modified scripts.dll
Tried to run it in compatibility mode, nothing.

Its not only on "quit" it also crashes at random times while playing.

And don't forget crisis.

A BIG FUCK YOU to the fds. ;p
