I gotta admit, behind the waterfall is a rarely used spot for snipers. Just this morning actually, a Havoc was hiding back there, and he fired a couple of shots that got my attention. Then some n00b stopped to repair his stealth tank RIGHT IN FRONT OF THE WATERFALL!!!I saw the havoc getting ready to run out to it, so I ran behind the waterfall and killed him. I told him nice try, but then he had the nerve to say 'I wasn't even at my compter' when he had just fired off two shots at an arty like 20 seconds earlier.bah

You need two people to jump on each other and eventually one of them will hop up onto the Refinery.

Sry Kirovy1234, but even if YSLMuffins complies with your PM that you sent him, I'm not letting this peice of info get away. YSLMuffins Posted this, and Kirovy1234 does not want you to know about it, but I am going to insure that every one will still be able to see it even if YSLMuffins complies with Kirovy1234's wishes to keep it secret. You need two people to jump on each other and eventually one of them will hop up onto the Refinery. Besides, its not like a lot of ppl don't know this already, its just that many of them cannot get good team work to make it happen.

Ever tried to drive a sedan or pick up truck into buildings?Its pretty freaky crusing down the halls in the hand of NOD in a sedan...excpet when you get stuck with an lon beacon ticking away upstairs Once my brother turned the GDI barracks into a garrage, its just to bad he didn't take a snapshot.You know, that might be a good idea for GDI. After all, the barracks has got a lot of room filled with nothing.Hey they might get enough money to equip each ORCA with a parachute.

I dont know whether its a glitch or a secret spot..I suspect glitch however.This is kinda hard to explain so Ill get us there 1st.On CNC CANYON as either team approach the nod base entrance

where the bit goes down into the underground area in the base,veer to your right and take the little path that snakes around to the hand of nod.stop be4 you take any turns and jump to the little ledge on the left and then onto the big grey flat shaft that overlooks the nod airstrip... note its just too high to reach jumping so you have to get there like that... then follow the wall on the right side and at the edge theres a sloped bit of ground which u can jump up to get higher,..then u appear in an odd place hgi above everything... you can see under the ground bit.. and above and fire on things but not be able to take fire.anAnyone been there...Btw its not the cnc heaven glitch that you sometimes get.

Actually one nice sniping spot in walls_flying is the roof of both refineries. Go there and get as close as you can to the edge of the roof (normal access from ramp). Then crouch and you can snipe unsuspected victims. It usually takes a lot for them to understand where the bullets come from. Also you have infinite ammo and get rid of reloads.

I second this, but you should use the cheaper sniper only if you want to stay hidden longer.
