If you installed 4.0 before 1.037 you will have to uninstall everything and start again unfortunately.

Follow steps 1 -> 5 (but NOT 6-8) from

<http://www.renegadeforums.com/index.php?t=msg&th=24533&start=0&rid=2893>

Then install 4.0.

Actually the 4.0 installer should install the necessary bits to bring your install up to 1.037

Oh, I wasn't aware of that. Still, it might be worth doing a reinstall anyway to try and fix the problem...

It will likely finish eventually, please wait longer. If it's updating always.dat, it may be downloading a few 100 MB.

Alternatively, download always.dat in the language you have installed from the following location, and replace your always.dat in your data folder with the downloaded file.
