Since the update to beta 3, I have to remove Walls Flying in order to play any map. The server won't d/l it due to it not in the server. So at the moment, I can't play that map.
Joe

Sounds like either your Walls Flying mix file is corrupt or the server doesn't have the right Walls Flying entry in the anticheat.ini file (or the right Walls Flying mix file)

I have experienced this with another map, can't remember which one, but I found it only occurred on one server.

What message are you quoted with? Could you take a SS of what happens?

Admin Message from Host

Invalid C&C_Walls_Flying.mix found, you have been blocked by the anti-cheat

Okay

5 12

Run the mixcheck.exe file located in your renegade folder, it checks if all your (map) files are OK.

Caveman, the attachment says walls, but the content is city flying, I can play city flying.

Iran, here is a SS

Can you connect now? If not, then we might have a bigger problem on our hands..

Yes I can, apparently running mixcheck did the trick.

Thanks to everyone who showed an interest in solving my dilemma.
Joe

Oh, sorry I forgot to mention that mixcheck.exe also repairs any files it shows as being damaged or w/e.
