This plugin enables infinite ammo the same the option for SSGM 2.0.2 does.

To install, place 'InfiniteAmmo.dll' in the root FDS folder and add an entry under [Plugins] in SSGM.ini.

Contact me on renegadeforums.com under the nick iRANian.

I've been using this plugin, it's great.  
But is there a way to make spawn, drop, and character and weapon crates to have infinite ammo too?

Edit: Does this plugin only work with 4.0?

Not sure, and yeah this only works with 4.0, ssgm 2.0.2 has it built-in as an option in ssgm.ini

Could someone update this to beta 5 please???

Thank you!

Kinda figured you wanted the 1.1.

Try this out if it fails let me know and I will fix it.

Note: I'm a n00b at C++ so THAT MEANS I'm learning it still, If it fails I will try to fix it.

Yes but he wanted robs version of it because it works with the crates...

So I just went in and fixed it to work with beta 5.

Also Thanks zunnie for helping me out again.

you might be better of copying the code

or by sending a custom to each player as the code has been implemented for ammoregen

thats better than running multiple plugins

I'm running iRan's...  
To get infinite ammo from crates/drops/pickups just refill.

I've uploaded v2, the plugin will now every second set the clip bullet count of the weapon being held by every player to infinite. This should fix all the issues hopefully. As a result it might take up to a second for the clip bullet count to turn infinite.

Xpert reported an annoying issue with one shot weapons so I redid the method I'm using, I'm now using the old SSGM 2.0.2 method with Whitedragon's help combined with some hacks.

Thanks to Xpert for helping me test and suggesting a solution for something important that was needed.

With this new version players not running Scripts 4.0 need to RELOAD (not refill) weapons picked up from weapon drop/weapon spawn. For them it'll also show 4.0 players as reloading when they're actually not, that's because the code is done client-side so I can't fix it.

I've attached version 3 to the first post in this topic.

Uploaded v4, there's a small optimization and C4 no longer gets refilled when picking up a powerup.
