windows 7 32 bit
first decade, c + c renegade ctd
tried run as admin
taken ownership of files
tried compatibility mode
as a test changed standard account to admin
then game ran no problem but when i changed back then ctd
don't really want to give other accounts admin rights
is it possible to run this as standard user.

So um, what error are you getting when you try to run without elevated privileges? I'm running
Windows 7 and have never needed to run as admin. Are you using scripts 4.0?

I have only had to use admin privileges for renlist, there is a way to make an admin shortcut using
task scheduler but im not sure if that shortcut link would work on all accounts...
