This plugin will add a console command to shake the camera violently for a player, if that player is running custom scripts.dll. The following console command is added:

SCRENSHAKE <ID> <DURATION> - Shakes the screen of a player for a variable DURATION.

To install place 'ScreenShakeConsoleCommand' in the root FDS folder and add an entry for it under [Plugins] in ssgm.ini.

You can contact me on renegadeforums.com under the nick 'iRANian'.
