Try running the same graphics settings on both and you will probably find they are the same. Based on the lol-blurry APC in the left hand image it looks as if that was taken with absolute minimum graphics settings, which do reduce the number of particles per emitter as I recall.

The smoke is thicker and whiter than pre-4.0 on minimum settings, but pre-4.0 if you set the details to low the smoke would be "less" then details set to high.

I've been playing with increased settings ever since I got my new computer last year in January, and I really hadn't noticed any difference, the smoke seemed just as thick to me. But after I got 4.0 I really can't see shit anymore in tank fights.

any announcements on a fix?

Subject: Re: Smoke

Posted by [Jerad2142](#) on Fri, 27 Jul 2012 12:41:51 GMT

[View Forum Message](#) <> [Reply to Message](#)

Particle detail is controlled separately from texture detail; however, a low texture detail would make the emitters harder to see, due to the lack of detail in general. In addition, if you have particle detail set to a lower level it will reduce how many are drawn on screen.

Increase both to max and disable shaders (in both 4.0 and non 4.0) and then see how it compares.

I know it sounds stupid, but have you tried turning the gamma down in rene? Also try messing around with your resolution. I use 1280x1024. While I could use 1440x900 I prefer the 1280x1024. Also, I know that you said that you've turned shaders all the way down but have you actually

disabled it within your client? Try that.

Failing that, I guess start posting (more)screenshots of your game.

2 of those have horrible texture settings. The snow one is brighter than the rest so that's more to add to the effect (especially if bloom is enabled).

But anyways, chances are if you had the texture quality on shit you also had the particle level low too, which would cap how many smoke particles are made.

To me it looks about the same as it always has to me however in stock ren.

Subject: Re: Smoke

Posted by [jonwil](#) on Thu, 06 Sep 2012 02:04:41 GMT

[View Forum Message](#) <> [Reply to Message](#)

I should say that 4.0 (at least the default install) does NOT have any "shaders" except for the fxaa shader support.

It does not have bloom (and as far as I know does not even have the code needed to support it) As for the talk about "removing shaders.dll", that will never be possible, shaders.dll is not just for shaders, its got a lot of important code (the name shaders.dll is a historical artifact from when it did contain mostly shader code)

Subject: Re: Smoke

Posted by [jonwil](#) on Thu, 06 Sep 2012 02:09:26 GMT

[View Forum Message](#) <> [Reply to Message](#)

I should also add that the only way you could have any "shaders" running other than the fxaa shader is if you have a "shaders.ini" file or any .shd files loose in your data folder (or in mix files)

If all you have is the official TT always3.dat file (and its included default.shd file) you will not have ANY custom shaders running except the FXAA support.

[View Forum Message](#) <> [Reply to Message](#)

I've checked with stock and 4.0 on all settings and the smoke is exactly the same on all settings, except for the white being a lot brighter

Setting 'Geometry Detail' to the lowest setting helps a lot, but it's still a bit brighter then.

Subject: Re: Smoke
Posted by [Major-Payne](#) on Thu, 06 Sep 2012 19:42:59 GMT
[View Forum Message](#) <> [Reply to Message](#)

I don't see how it can be unrelated to TT when before TT there was no remote mention of this bug and now literally everybody i play with closely complains to me about the smoke and how they cant see shit.

It's not like "oh you've got your settings fucked up" that causes this. A host of people are experiencing serious issues that makes the game UNPLAYABLE at times. If there is more than one tank shooting at you you cannot see a thing, you have no idea where you are aiming, the only indication you are hitting anything is your points going up. It's so damn bright you can't even see the selection box clearly

This all started after 4.0 was released, and it's not one complaint, it's dozens (possibly hundreds, who haven't complained) of people experiencing this issue

The bug is down to 4.0 and it's down to TT to fix it.

Subject: Re: Smoke
Posted by [Xpert](#) on Thu, 06 Sep 2012 21:52:12 GMT
[View Forum Message](#) <> [Reply to Message](#)

TT should play in Jelly and experience a full out tank fight. The other day, I was tank battling on Field and my goodness it's near impossible to see when a bunch of mammoths and med tanks are shooting a specific target. The white smoke is too thick. This has never been bad in other

scripts versions.

Subject: Re: Smoke

i have no problem whatsoever with players using that skin on my server

i'd rather everyone saw things that way

same goes for arty screen shake; either have it 10% of what it is now or just remove it, and let visual/game effects play less of a role in determining game outcomes

Subject: Re: Smoke

Posted by [Ani](#) on Sat, 08 Sep 2012 05:08:53 GMT

[View Forum Message](#) <> [Reply to Message](#)

I'm actually going to retract my previous statement and say that I indeed experience these "blistering white" explosions on my screen... I never noticed the difference really and it doesn't really harm gameplay as much as people claim it to me. I understand if there are something like 10 mummies coming and rushing and attacking you, you probably can't see a thing - and you shouldn't either, lol.

That being said, it's not hard to play at all with the explosions the way they are in a server with ~30 people.

We're not changing gameplay mechanics. The smoke thing might be a bug, the arty shake certainly is not.

Subject: Re: Smoke

Posted by [StealthEye](#) on Sat, 08 Sep 2012 11:46:21 GMT

[View Forum Message](#) <> [Reply to Message](#)

Arty shake can already be disabled on the server side. It is also offtopic.

I just tested it again, I see no difference between stock and TT. Yes, the smoke is quite blinding, but it also happens in stock. Are you sure that you are comparing to stock (without any scripts.dll)? It is possible that some previous version of scripts.dll had a bug that made the smoke less visible.

If you are indeed comparing to a stock copy, please install Renegade to an empty folder (without any custom scripts), then copy the folder and install TT into one copy. Test it with two players. Fraps the behavior in both copies (screenshot is not enough), using the same resolution with the same settings, and shooting on the same map in the same location (i.e. keep as much as possible the same except for TT/stock).

Subject: Re: Smoke

Posted by [liquidv2](#) on Sat, 08 Sep 2012 23:24:38 GMT

[View Forum Message](#) <> [Reply to Message](#)

my concern is that a 50 player game creates a problem with smoke and screenshake; the amount of it becomes nauseating, in all honesty

might seem fine and dandy in a 10v10 or something but when you have that many players running around it becomes a whole new ball game

sorry to bother you StealthEye, but how exactly do i disable screenshake serverside?

Subject: Re: Smoke

Posted by [StealthEye](#) on Sun, 09 Sep 2012 01:01:41 GMT

[View Forum Message](#) <> [Reply to Message](#)

If that's stock behavior, then we're not changing it. If it isn't then we should fix it. I still don't know which one is true.

It's a server.ini key. I don't know which one, but it was in the release logs for beta 5/4/3. This is still offtopic, so create a new one if you want to say more on this.

Subject: Re: Smoke

ok, guys, we really need to know (with proof in the form of videos) if there really IS a difference between 4.0 and stock renegade (not 4.0 and 3.4.4, 4.0 and STOCK)

If that information isn't provided, we will be unable to do anything to make this better.

Subject: Re: Smoke

Posted by [Jerad2142](#) on Mon, 10 Sep 2012 12:37:24 GMT

[View Forum Message](#) <> [Reply to Message](#)

Actually I think that we have this backward, explosions were dim for AMD before 4.0 and 4.0 fixed it. Because I just finished playing on 3.4.4, and all the explosions were just as bright if not more than what these pictures are showing and I'm running Nvidia.

Subject: Re: Smoke
Posted by [iRANian](#) on Fri, 14 Sep 2012 18:58:29 GMT
[View Forum Message](#) <> [Reply to Message](#)

I've taken a second look and the smoke is the same with 4.0 and stock with no scripts, BUT the smoke is a lot less bright with 3.4.4 (like in MUDKIPS' screenshot).

The first time I tested it I was using stock with scripts 3.4.4, I wasn't aware of that, thought I wasn't running any scripts.

here's a comparison between no scripts and 4.0:

StealthEye wrote on Sat, 08 September 2012 18:01If that's stock behavior, then we're not changing it.

The bug in question affects much more than particles, including stealth and anything else alpha-blended and is non-deterministic in nature. Since particles behave like stock (and w3dview for that matter), there is no bug here and we aren't changing it. If you don't like how existing particle systems look, change them; e_master01.dds is a good place to do so.
