Reborn cheating in public server(s)...

If it is him ofc.

Why do I confuse Renardin and Reborn with eachother

No we use BRenBot (I run RenCorner) - which brings up the whole topic of this new 0x91 guy who claims to be from the TT team. Considering Kamuix is hosted in Europe and the guy has like 58 ping in that screenshot it narrows the search down to whoever is from Europe and on the TT team.

Someone brought to my attention to a radar hack that works with TT. The SS he used showing it off in [a certain forum] shows KamServ as the host, whose IRC I've started idling in just a few days prior to the post.

I looked up some logs from the day 0x91 posted (the user who posted the hack, not to be confused with 0x90), and pulled this:

<http://pastebin.com/fuHkZEea>

The map is Walls Flying.

On line 27, the Weapons Factory gets destroyed (it's destroyed in the SS)

And in line 75, redude joins (12:10). He leaves only 2 minutes later.

On lines 85 and 86, the messages line up just perfectly with his SS.

On line 89, it says he dealt some damage to Barracks, presumably with timed c4.

I'm 95% certain that redude is 0x91.

I'm the one who called it (that redude/reborn was the guy behind the new radar TT hack) and made the people started looking into these things because I noticed that on the YouTube profile page where "0x91" shows off the functionality of the hack, it says the creator is 41 years old and lives in the United Kingdom. Which matches up perfectly with whom reborn is. The dumbass was so clever he forgot to fake his Google/YouTube account stats, lmao.

The screenshot that showed off the functionality was taken in Kamuix - which is hosted in Europe and the 0x91 guy was getting 58 ping - definitely a European then.

Logs also show that reborn was either the one taking the screenshots in the server at the exact same time or he was just in the wrong place at the wrong time.. lol

Reborn also used to be permanently banned from that cheat site which now is mysteriously unbanned....

It all adds up and quite frankly i'm sad to see reborn going down this route, everyone knows he was a cool guy and dedicated a lot of his time in Renegade, obviously something made him snap to dislike it/us in such a way.

It makes a lot of sense because when (i'm assuming this now) reborn got banned off Jelly he started playing in my server a lot.

He was even on teamspeak and mentioned how there was this new guy called 0x91 making a radar hack for TT and reborn was basically praising the guy saying "God I wonder what else is possible if he managed to hook into it" - go figure.

This just goes to show you anyone can snap at any second..

Perhaps he just got bored with Renegade, and its community.

Or, if we want to make it an intense plot: maybe he wanted to release a hack as 0x91, and to fix it as Reborn, to make himself a hero among the community!

Also, something I have to point out; reborn said (on teamspeak) before that if someone has the source code to 4.0 they could modify it to the point where if the server tries to perform a sshot function on the client the client would actually end up uploading a virus...

I hope this isn't true. I also wonder what the impact on Renegade will be considering reborn has the source code to TT...

1. in the screenshot the guy is nod, like redude is in the logs
2. wf is dead like in the logs
3. reborn's font and resolution matches the one in the screenshot
4. he kills a GDI guy with full health left after killing, so probably afk in a building (like in the screenshot, could have killed the guy in barracks):

Quote:[12:12] <&KamServ> 11[4PlayerKill 11] 4 redude 4(11100% 4/ 11 4) killed 7 ghost
4(11GDI Soldier 4)

does that log say he has full health?

5. he has 658 credits, which is possible as the kamserv's starting credits is 200 and the credit tick is 2.5/s, according to the logs redude plays for a maximum of 120 seconds.

If it is reborn, I do not understand why he doesn't just build an aimbot right into the TT sourcecode. Shouldn't be too hard, as all information is there.

Since the upload is just a HTTP upload send to a specified server, this could be done by anyone with a bit of HTML knowledge. Therefore it is recommended that the webserver performs proper input checking. This falls outside of the scope of the TT team.

If I know the location of your uploadscript, which can be easily found when ingame, then I can just create a simple HTML page with an upload form and upload it to that script. Probably takes me less than 10 minutes start to finish. And I'm not even a half decent coder.

It isn't 'me'.

Although I have likely caused this.

My PC is was pretty unsecure in retrospect. I have had fileZilla running on my PC and teamviewer running open to quite a few people. I suspect it was one of the people I have shared my credentials with, or they shared it with someone else.

I'm pretty embarrassed, and quite honestly it makes little difference really whether it was me in those videos or not. If I am the person who was responsible (albeit through stupidity rather than malevolence) for a leak, then every cheater who has access to a TT cheat is pretty much down to me. Not a legacy I would be fond of.

I checked my fileZilla logs and they have been cleared.

I've turned it all off now, but I suspect the damage has been done. It looks like this occurred while I was actually at work, and not even home.

Yes I have been playing in your server, I like it. I have not been banned in Jelly (although I guess I might be now?).

As the for TS conversation, I regularly check those forums. So do quite a few people here... I was not praising the guy, I feared what else they could do.

'I' haven't done anything, although I accept that this is likely caused by myself.

If there has been a leak and it is caused by me, then there's quite a lot they could do I guess.

Yes, I said it would be possible, there is likely lots more that would be possible. Uploading a virus seemed pretty bad to me, and I mentioned it because RenCorner takes screenshots automatically.

In summary, I do care if people think it was me or not in those videos, because I wouldn't like to think that people believed that's who I am.

However, it is of little comfort whether or not this is accepted/understood/believed to myself, as I fear I have caused the damage anyway, and it's not something that I am proud of.

If I have caused a leak, which it seems very evident that I have, then I probably deserve the shit I

am getting for my own stupidity.

Things still don't add up.

Since when it was it common sense to not turn TeamViewer and/or FTP server offline to your home computer whenever you're going away for a period of time? Especially knowing that you have the very source code to what can make or break this game (that you've oh so cared about for so many years.)

TeamViewer does not give ANYONE a crystal clear picture and would be terrible for someone to try to play games over it. It's not playable, the latency and picture distortion would make what you claim to be impossible.

You also claim to have been asleep through all of this, yet at the same time you were on our teamspeak (yes, YOU, we all know what you sound like and we got ear-witnesses) and being fraps'd of you locking onto people randomly in my server. Since when do people sleep, talk, and play games (and test their cheats out)?

Weird how your old reborn account got unbanned recently off UC..

Weird how the screenshots of your game using sshot match up with the screenshots of 0x91 showing off his new hack.

I think the greatest issue at hand is the fact that someone has the TT source code when they shouldn't, and they are fully capable of doing bad things.

Whether or not reborn himself cheated in a server is irrelevant in the face of such an issue, and if reborn is indeed innocent he'll have to live with the fact that he fucked up badly and let someone in his PC to grab the source code.

I'm still not convinced but let's not be blinded by the fact that there is just another cheater out there.

As it stands, there is no 2nd person. His IP, his serial.

Using remote to your computer to play renegade? Why would anyone waste their time.

There are 2 different huds in the screenshots. Why would someone waste their time downloading

a hud into reborn's computer lol?

This is just too blurry.

I'm aware, but if you watch the video all of the time's he's chasing sbh he's shooting close to where they are but not always quite hitting them, that would be easily explained by the fact he was making a video for this radar hack just yesterday...

You can't see the person's renegade half the time. It would only show you the desktop on teamviewer even though the game is running.

There are other times where you can see the game, but it delays like hell. It skips so bad on teamviewer even though it looks fine on the actual computer.

Spoofing ip's has been done in renegade before, not often, but there has been a couple. One in Atomix I remember, and one in MP missiondm. The Ax one I don't recall specifics, but the MP one I do remember, it was someone using our server owner's IP(Strike).

The serial part, that'd be easy without having his exact serial. Alls the person would need is access to an admin channel(or a moderator) to get a hash and our favorite ren cheat. I had Campa redo his serial auth due to that, people were able to join and get moderator powers due to the RGcheat.

The HUD we already said was different than his normal one, it's one that G1D has and/or

released.

The font in that picture with Kamuix is something that server does. We joined it lastnight and that part's changed, it force-changed my stock font. Just for those particular lines, the rest looked normal.

"Whoever" it is seems to have a hardon for G1D, even mimicing his writing style. If it really is reborn, I hope he doesn't go releasing anything to destroy our game.

Reborn, no matter the excuse, STILL let someone/did cheat using scripts 4.0 source. And his current excuse has him breaking TWO common sense rules, especially to someone like him. No matter the cause, he should be banned.

Good One Driver did not release that HUD. The HUD in the Screenshot was the D6 4.0 HUD that was released by someone else a while ago. Even I use it. So a HUD isn't an excuse to point fingers.

There's an easy enough way to tell if someone really was teamviewing on his pc and using his Renegade or him doing it. Check the folders for 'date modified/accessed', check the 'last run' of Renegade in regedit. Even if that folder was deleted, it's still going to give some info.

I feel like a total idiot for what I've done to Shaitan in the past too. While we disagree on alot of things, and I think there are some differences we will never get past, I have admired the fact that you've tried to stay impartial and look beyond blind hate.

True, you managed to get a dig in at me over on my own forms, but I think I more than deserved that.

I'm sure the truth will 'out' eventually (I hope, lol), and when that does, I would like to put some things right in that vein.

For now though, I feel like I do owe you an apology for acting like an asshole to you.

Quote:Hey peeps!

So TT servers can get a screen shot of your game, so making a visible radar hack seems like a pretty silly idea, even if you can switch it on & off.

I've been having some fun with an aimbot hack tho, its not without its flaws though, as the reticle 'snaps' to the closest enemy.

I think making it lock onto one target only, and turn itself off after killing him is probably going to be the way forward.

Anyway, have a look at the video and let me know what you think.

I think it's quite clear from the video's that where in the thread you originally linked to, that an aimbot was already in use.

I do not think that that kind of about face turning on the spot could be achieved naturally, by reacting to a hacked radar.

However, the video shows a player joining two servers. I am quite sure that someone must have some logs of this guy's IP?

Did the guy join the servers after this thread was made? If so, then it would not have been from my PC.

I hope this goes some way at least to show it isn't me. Although it remains pretty clear that I have caused a leak and put TT in the hands of an asshole.

When I was playing in RenCorner, I joined TeamSpeak. However, when the videos where taken that are in the Jelly thread, that was not me playing, and they wasn't on TS at the time.

OK, seriously, what the fuck?

My domain name log-in for where I work is 'ellipse' (something they do for everyone is form your user name as part of your forename and surname, mine being Elliott, Spencer).

This is cashed and present when you launch my work's portal (which is my homepage on my home PC).

I am more than happy to show this to any of the TT team.

It could be my paranoia, but why would you use the word 'ellipse'? That's too weird for me! What was you referring to?

you posted a screenshot to show your high k/d

every single player on the other team had a k/d less than 1.0; they had no Hand of Nod, and they couldn't possibly fight back

i'm glad you find joy in beating up on a defenseless enemy - good for you DJ! you show em who's boss!

What topic? All there is to say is what has already been said:

reborn made cheats and used them in public servers, or some guy randomly (or not randomly) managed to gain access to his computer via FTP, Teamviewer, VNC, RDP, etc, took the source code of TT, made an aimbot and a radar hack with it, and ran it on public servers. All the while of course over a remote connection. Playing RENEGADE.

regarding that [Dragon] funwar and your fraps, it was pretty funny seeing you shoot a guy 5 feet behind a wall that never actually moved
you aimed and lit up his hit box which was several feet out of view, and as you fired he dropped to the ground dead several feet behind the wall that he still hadn't moved from and you still couldn't see around

you don't openly ask to be made a mod, but you do suck up tremendously wherever you're trying to become a moderator
it was st0rm last, but since then you've drifted over to n00bstories
you play at servers consistently until you're finally asked to be a moderator
at Exodus they said you were in there every single day until you were made a mod, and then you basically stopped playing
i cringed watching you kiss Wilo's feet

though i agree with what Wyld said in that quote - i'm not surprised that a server would mute ACK lol

@ Ack: No clue wtf you are talking about. The post you quoted was just me LOL at you getting muted. That is it. Hurt your feelings did it? Sorry wasn't my intention. But overall I really don't need to be "good" with you. Never have been. Further I thought about your comments and realized, wow that is all you can come up with in 10 years of playing...mod chasing? You weren't even right.

As far as my modding over 10 years, I play in servers and have fun. I have people skills so I am asked to mod. You all have no clue how many times I have said no. Liquid, I don't even remember being an Exodus mod lol. They made me one? I had servers make me a mod and I didn't even know. (I think Xphaze did too) Suck up to be asked? Hardly. Anyone who knows what being a mod / admin is knows you really don't want it. Yeah spending hours on Ren-Archive's server after Cunalinga or Bears screwed it up, Yeah fun fun. Dealing with idiots in the server like DJ, immature s like XcorruptX, cheating mods, etc. Yeah fun fun. I resigned every position I had. Of course no argument after finding out what Wilo was doing st0rm was a bad choice to make a ren home at and I regret it. I liked the mod in the server.

The fact that the KKK+1 clan (MDK, DJK, ACK, G1D) don't like me is a testament to the others that do.

Yeah Liquid is right at one point some of the servers I was mod/admin on my playing time decreased due to just timings of a few tragedies in my life. Like my wife getting cancer and my best friend from childhood passing away 2 hours after he woke up and dressed for work about 5 years ago. My apologies if I left a few posts but that kind of shit kind of alters ones immediate life.

Yeah if I wanted to be mod as bad as DJK does, then why would I stop playing? One would think I would be in the server all the time to use my POWER like DJK does lol.

Those that know me, know me. Those that don't, read the words below my signature.

I don't and thanks for your kind words. It's gaming I take nothing serious here.

I rarely see anyone stand up to ACK and at the same time he generally left me alone. But since MDK is gone and he got his posts toward DJK out of his system, apparently he had a bit left and pointed his bs in my direction. I was going to ignore it but I decided to have some fun and push back where no one else does.

Spelling/Grammar: This is a gaming forum, not literature. Keep the urge to correct to yourself. If it pains you so much to see someone misspell a word, miss a comma, etc., give them lessons in private because we don't want to see it on the forums. In wyld's defense for n00bstories:

Wyld never plays on his his nickname when he goes in n00bstories. He smurfs a nick everytime. I don't even know the last time he has played there it has been quite some time unless he got better at staying below the radar.

So he is far from trying his hardest to be a mod there if he won't even show his face in game. Wyld contributes to a lot of forum action because he enjoys what happens out in the reneworld. That will not get him mod power alone with just forum participation.

He is a good man, and always had my back (not for sucking up purposes because he definitely has not bought me any flowers or candy yet).

Just the purple text on NS forums needs to go! Write in normal default color like the rest of us.

Quote:"Who cares what people think, it is what you know."

As mentioned earlier: if you didn't care about what people thought, you wouldn't justify your actions to others. Let's break that down and replace "justify" with one of the definitions that word has.

As mentioned earlier: if you didn't care about what people thought, you wouldn't attempt to prove or show your actions be just, right, or reasonable. Their words would be meaningless to you. You obviously do care what other people think, which is why you're here justifying your actions and trying to portray yourself as a Nice Guy.

Quote:"Feel the Love."

Your posts don't show a lot of love. Perhaps you should define what "love" means now, maybe you'll get a 50% success ratio defining one word's usage correctly out of two.

I'm not a fan of DJ, but at least he isn't throwing out that shallow "I'M ALWAYS NICE BUDDY BEARS ALWAYS GET ALONG" fake personality that "wyld1usa" uses to try and gain favor for himself.

They're both annoying in different ways. I'd actually say that I find DJ somewhat more tolerable because he's being hated for his own faults, where "wyld1usa" just pretends that he's this great guy that everyone falls head over heels for.

That's my point. DJ's hated for being himself, where "wyld1usa" somehow avoids a lot of hate because he throws off a fake Internet persona so he can convince everyone they love him.

Can I be thoughtful and kind to everyone on here? Certainly, and I've done it many times, but if I think someone's being retarded I'm not going to hold back. This is why "wyld1usa" is now the target and DJ is relegated to the backburner.

You actually fit the definition to a "T". Wow. I do feel sorry for you though, you were probably like those kids that I regret picking on in my youth. Basically because it damaged them like we see in you. (Refer to the definition of pompous ass above to clarify.)

Have a nice life and I truly wish you well, but we will not speak again (enjoy that) as I have had my fun beating up on you.

Remember all, this is a gaming site where we are supposed to have fun. I think I have drifted from that as well. People like the KKK +1 clan have helped me realize that. I will fix that, maybe it is time you all did too. See you in the servers (you won't see me though lol).

You do realise that Teamviewer has a VPN option, if you set your default gateway to that VPN gateway you can spoof the IP address,

having access to the gateway allows access to the serial (obviously remote capabilities by the ID / Pass)

That's a theory i guess.

or reborn is a hacker (:

either way reborn might want to lock down your gear a bit better and keep your TV ID secret ...

The amount of rene-players using it would be rather limited though. I know of communities that have already banned this dns address and I'd advise you to do the same. Just make sure you create some form of whitelist so that when players post on your forums that they can't play and your certain that they're not this guy, you can add them to the whitelist.

how come reborn and 0x91 both use the same intro in their videos and both have the tank headlights that ACK included as a seperate download for fjords?

0x91: http://www.youtube.com/watch?v=1HCule3z0kg&feature=player_embedded

reborn: http://www.youtube.com/watch?v=vbXlIO68Fjo&feature=player_embedded

which in both videos only seems to work with the backlight for the harvester, not for any other vehicle?

edit: this video has the same video aspect ratio and similar random music as the 0x91 one:
http://www.youtube.com/watch?v=bCB_sLXLQEY&feature=plcp

fjords 0x91 video description: "A hack to demonstrate a working version of a TT hack that shows the enemies mine count, and vehicles.

It also shows the previous radar hack and fog hack working at the same time, too."

reborn apb video description: "A video demonstrating the modification tot he mechanic made by MP-Gaming.COM for APB 2.1"

reborn apb and 0x91 fjords vid have the same aspect ratio

reborn city and 0x91 under vid have the same aspect ratio different from the other above vids

I use Windows Movie maker and always choose the highest screen ratio for my uploads, I'm not sure what relevance that has? :-/

I thought it was all pretty clear when the guy started joining to make videos from a different IP/serial.

I had dazzle.ini left over from the manual download of fjords, the video you linked to shows 0x91 using the same map, so presumeably he got the same file?

There are many other people with that map too...

I am not 0x91.

You and him just happen to be pretty much the only british guys using dazzle.ini from Fjords, use the same two difference aspect ratios for in-game footage in videos, use the same intro text settings for windows live movie maker, use the same encoding settings, both have the exact same HD resolutions on youtube, use the same terminology to describe videos, listen to the similar garbage music and he just happens to leak the code from you. You also started playing renegade a lot after you got caught on jelly marathon so i'm not exactly sure how you didnt notice someone using teamviewer multiple times to play on multiple servers via your pc.

So who were the people who had access to your teamviewer?

I have no idea who else has Dazzle from fjords. I'm sure it can't be limited to myself and 0x91, though.

Quite honestly, I'm not sure how you would know how many British people have it, either. Where would you get that information?

Is there a list of people who have Dazzle.ini cut by geographic region?

I'm pretty sure that the in-game resolution is different for most of the video's. Mine are consistantly the same.

Regarding the aspect ratio, I always use Windows Movia Maker and apply the highest settings. I don't know much about it, or what that would prove or dis-prove?

I'm guessing it means we might have the same size monitor or something?

Granted, the text seems very similar, but MDK for example goes to such lengths as to make fake facebook accounts to get personal information from other players. My youtube account has been active for years, and the movies are public. It isn't hard to find them, or emulate them. It's like me buying a red t-shirt months ago, and being accused of murder because some dude purchased he same red t-shirt that he knew I purchased, and then he killed someone.

I'm pretty sure that most people upload in HD if they can? Using the highest settings in Movie Maker will do that.

I do not acknowledge that the music is similar, but even if it was, it would be entirely possible for them to download the same music as me and apply it to their music, making it even more convincing.

Why does me playing renegade more often have anything to do with it. Especially after the event? Surely if I was playing lots, and then suddenly stopped playing after being caught might lead you to that conclusion, rather than the other way round?

I go to work, and I used to leave teamviewer running, allowing anyone to connect on the same password. It would be easy to not notice someone connecting, as I am not at home on my PC 24 hours a day.

Lots of people had access, I do not even know now as there have been so many people connect over years. I am reasonably sure that the following people connected with renegade have connected at some point:

StealthEye
SaberHawk
jnz
Campa
Omar007
Oxi
Strike
Dead6re
v00d00
Zunnie
GhostSWT

That list is small, but there are lots of other people that added me over time to msn and just asked for help, I can't remember them all, and my msn list has not been cleaned since I created it over a decade ago.

There are any number of people that could of connected, or given the connection details to someone else. It's impossible for me to tell.

I'm sorry if you don't believe me, but it's the truth.
All I have ever done is try to contribute.

Some poeple added me asking for help with level edit or programming. Sometimes I would join there PC, sometimes they would join mine if they didn't have the tools installed, or to see how I did/do something.

Sometimes I would ask other people for help, which is pretty much limited to the people in that list.

I can't remember whether xpert joined or not. I know a while ago I was helping him with a no-reload mod.

Yes, I would leave teamviewer running. I would use it to remote to my PC from work or my iPad if I needed to.

Yes, I am aware how stupid it was.

Shouldn't you get a new password when you restart TeamViewer?
I know I do if I run it but I'm running it directly, not installed.

I long lost your TeamViewer info but yes I did once connect to you. IDK if you recall but that was when you were working in C++ with registry keys and needed help with that.

You might want to use LogMeIn instead of TeamViewer for remote access. I personally do and it is more secure as they won't be able to ever login with a simple id/pass combination (which are both numbers only). They'd need access to your LogMeIn account and know your windows username/password combination.

You can still use TeamViewer if you need some help but at least then you can monitor who connects as you're right there on the computer.

i'm gonna but in and note that if you have even half a brain, you setup teamviewer with both a Static Password, and a dynamic password, the dynamic password generates on connection so you have to read it out ... sounds very suspicious when you're giving your 24/7 access password out, that's just downright silly.

Now i know you have half a brain Reborn so why wouldn't you do that?

I can understand Zunnie or Oxi using your PC, Server box and APB Code and all that, but TT Staff? again, you're smart, and i'm sure it's been noted in the thread already you have a FTP server running on your pc (Correct me if i'm wrong of course) i would assume you would use that to distribute files...

RGH5.0*
I though RGH5.0 was released by Iran, not too long ago....

Or maybe its because RC1 already blocks his "work".

Plus, if he did create anything, it would most likely be hotfixed quite quickly.

so did 0x91 die or something? seems odd he suddenly doesn't want to release anything now that 95% of renegade knows it's reborn, considering he had the good features of *cheat name removed*implemented already

are you at least gonna act you care about this? the burden of proof is on you to provide evidence that this guy isn't you, with the gigantic pile of data suggesting this guy miraculously is your clone double in the sense of being exactly like you, down to the distinct way in which he types in-game.
