We are running a server for MPF ( <http://www.multiplayerforums.com> ) with just italy and office in rotation

Will add cs\_assault to the list if it is created by Valve or a custom version.

maybe you should start writing server-side mods for it (in case people are gonna reverse engineer it like with CS 1.6 and CS:S), you definitely have more than enough experience for it

nice to see the server has great activity, i've lost all faith in valve after the CS:S debacles so i'm not gonna buy CS:GO
