First of, apologize if this is the wrong section, I looked for the nearest Technical Support involving Renegade Client wise.

So, I logged on a 4.0 server, and it autdownloaded a certain map (C&C.Joipa.mix) and I've been having problems with it.

I see only units and certain objects, I get no terrain, No walls, Just an empty floor and the sky.

I've tried removing the file, but a friend informed me that it doesnt neccesarly come with a file.

Is there any way I can remove this map and Redownload it, I've tried downloading the mix file itself and sticking it in my data folder, I've also downloaded a mappack with the map inside it, I've also reinstalled 4.0 and joined the server, and tried it in LAN alone, but it's still bugged..

Here's a few screenshots of the problem

<http://i46.tinypic.com/6pvique.png>

<http://i50.tinypic.com/142wbb.png>

If anyone can provide me with some useful information or an insight on how to fix it it'll be much appreciated, really dont wanna get into the trouble of reinstalling renegade, so many problems surround it and it's just tedious.

You could try deleting the ttf's file, which is somewhere in the Renegade folder (or possibly RenClient or Westwood or something along those lines...) in My Documents...

Putting .mix files into the data folder wont help because the 4.0 map system doesn't use the .mix files at all.

Deleting the ttf's file means you will have to redownload every custom map the next time you play though, since it contains all auto-downloaded maps.

don't have a ttf's in any of my renegade folders, I'm guessing this is something to do with package editing

^ This found the folder, deleted. Had to change serial to my legit one.. Stupid 4.0 changing it to a banned one

now downloading maps as normal, just need to wait for Joipa to appear somewhere to make sure it's all fixed ;o

EDIT: Joipa was downloading normally, got the file.. Loaded the map, Still same problem

am i missing textures?

Seems to me that the 4.0 downloader is skipping the terrain w3d file when its downloading. I'm not sure man :/

Problem fixed.

I went to work, came home and voila It worked.

---

work that one out.

EDIT: Rebugged, Imfao.
