Installing Renegade:
http://www.renegadeforums.com/index.php?t=msg&th=39331&start=0&rid=2 3454

Registering a nickname:
http://www.renegadeforums.com/index.php?t=msg&th=37326&start=0&rid=2 3454

Then just start the game and start playing online. (In the multiplayer screen choose Westwood Online (WOL))

What did the Message of the Day say when you started multiplayer?
(the popup dialog that first shows, where you'd click 'close')

Hmm looks ok..
You're not using Quick Match right? Use Advanced Game Listings.

Make sure no firewall is blocking Renegade.

If you really followed all the steps and it still says "No game servers found at this time" in the advanced listings, I'm not sure what is wrong.

Ok. If the Quick Match is missing you're already on a TT patch as they removed it.
IDK why it would have failed to properly install the first time though as the second time did work :/
