I believe its a large part of it. Fluoride is in almost everything here even in vaccines.

Mentioning vaccines go to 2:02:

[http://www.youtube.com/watch?v=6iu9HzaVbWQ&feature=player\\_embedded](http://www.youtube.com/watch?v=6iu9HzaVbWQ&feature=player_embedded)

In March, 2006, the National Academy of Sciences released a report recommending that the EPA lower its maximum standard for fluoride in drinking water to below 4 milligrams. The report warned severe fluorosis could occur at 2 milligrams. Also, a majority of the report's authors said a lifetime of drinking water with fluoride at 4 milligrams or higher could raise the risk of broken bones.

Then explain to me why 97% of europe no longer uses fluoride in puublic water.  
Explain to me why city after city in canada is removing fluoride from the public water.  
Fluoride is no doubt the biggest medical hoax in history.  
Tooth decay rate is steadily declining all over the world, whether the country was fluoridated or not.  
Why do we need such a toxic chemical in the water if it clearly has no effect on tooth decay when swallowed?

All you just did was make yourself look stupid, there weren't even any major studies on fluorides effect on the brain until recently. So in reality the public just accepted it with little information on it really does.  
And i told you to explain not post something that says there's lies out there we all know that. It doesn't mean every bit of data that opposes your belief is immediately false.  
There is NO REASON to swallow fluoride.

You'll pardon my skepticism of an 18 year old posting about OMG TEH FLUORIDE  
CONSPIRECY thinking they came across something amazing that just had to be shared with  
everyone else. Fluoride is the reason why your teeth haven't rotted out yet. Your dumb ass should  
be thanking it for that.

That is such bullshit.  
<http://sdsdw.org/wp-content/uploads/2011/02/who-dmft.gif>  
Tooth decay is declining in countries without fluoride added to the water at the same rate as here. It  
IS NOT NECESSARY to add it to the water.  
Such a childish thing, bringing age into this.

Thank god Fluoride is the ONLY thing those kids in those studies could have done differently from one another otherwise I'd say the control for the study was bad.

Luckily for us life is simple and everyone is the same.

On a more serious note, instead of stressing over things that may be, I'd only worry about things that are, because stress in itself is going to cause you far more issues then a little fluoride in your water.

Quote:

Many health problems are caused or exacerbated by stress, including:

I was going to grab a study for that, but apparently its just fact or something.

Aircraftkiller wrote on Fri, 07 June 2013 18:26 I'm against fluoridated water because I don't know what I'm talking about.

They should run the IQ test on that guy, but then it'd look like fluoride is good for you.

Some people are born with impaired immune system, kidneys, or liver. All three of which can cause serious complications with lower doses of fluoride compared to a healthy person or according to what you just said, everyone. What you are saying is who gives a fuck about them i want my teeth looking nice. Such ignorance is killing innocent people there are other ways to fight tooth decay without this deadly chemical.

Alcohol causes far more brain damage than fluoride ever well, and yet people continue to drink it. At least fluoride helps the poor by keeping teeth in better condition.

Zeratul wrote on Sun, 09 June 2013 04:58 It also kills the poor unable to adequately feed themselves enough to keep their system strong.

I now understand, instead of worrying about cancer, being run over, or the many other things that kill people, they should worry about the fluoride in their water. And instead of drinking that water they should go out and buy over expensive bottled water, and do everything from dishes to taking a shower with it, because U DONT WANT TO ACCIDENTLY DRINK DOSE FLUORIDES.

Of course, they will probably go broke from all the money it costs to get questionable quality bottled water and end up living on the street.

Thats not what im saying at all people need to go and push our governments to remove it from the water (seeing as they control the water supply) and remind them that we control their ability to be in office. Right now people wont do anything no matter what crimes they commit, the FBI was a perfect example of this, and they have gotten no heat over that at all.

shaitan wrote on Mon, 10 June 2013 08:03Sorry for being a dick, might have been a little trashed lastnight.

I was trashed last night as well.

MSNBC actually said something true? holy shit. But i guess it would be more shocking if it was Fox.

And im not so sure what you're referring to, is it the massive storing of all data on the internet, the recent shit with Verizon, or Prism?

---
