Because the people who have the permissions to add people to the "TT private beta test" forum are AWOL, its not possible to add people to that forum right now.

So I am opening it up to everyone. Anyone who wants to test 4.2, let me know in this thread or via PM and I will hook you up with the details for the test build as soon as I can. Do bear in mind that this is a test build and may contain bugs. Any bugs you do find, please let me know so they can be fixed.

<http://www.renegadeforums.com/index.php?t=msg&th=40895&start=0> contains a rather rough list of the changes in 4.2.

Anyone here with a server who wants to run 4.2 on their server, please let me know and I will give you the server SSGM files for this.

AWOL? Zunnie maybe, but I'm still here occasionally. Just not posting since it's usually quiet here
