---

Scripts 4.2 Update 2 is now available with a few small bug fixes.

Relevant changes made since scripts 4.2 Update 1 are:

Fixed an issue preventing recoil impulse from working correctly

Fixed some bugs in Jerad's scripts

Players already running TT should automatically receive this update when launching the game. If for some reason you don't, or need to install for the first time, visit the download page. Server owners will need to update appropriately depending on what they're running. (WhiteDragon will need to provide a Dragonade release that works with 4.2 Update 1/4.2 Update 2 so I defer to him on that)

Server-side code authors who need to update their code can get the new source code from the download page. Mod authors can also get the latest tools archive (including all the latest bug fixes) from the download page.

Thanks to all the testers, coders, and players that still support us and Renegade after all this time and to all those who helped make 4.2 possible.

I didnt play Renegade for weeks now, but after the update Mouse buttons 3+ arent supported. All fine so and nice work, but if i use page forward or page backward they arent supported. I used this button to get next weapon or to get previous weapon.

I tried to select other keys for the button previous page but it wont work, i think renegade didnt accept this input.

Can somebody fix this?

EDIT: ok i tryed it now and it works i dont know why but it does. last time i tryed all to fix this but nothing worked.

I think a reboot is needed for this update.

U can delete this commend if u want thx

Good to know its fixed, we'll keep it around just to make sure we don't start seeing more posts like this, will be good to keep track of such things.
