Hi all,

i'm trying to get a WOL server online here and after finding out it won't work under linux, i'm trying to get it going on windows.

But for using FDS in WOL mode, one has to ket a special serial. During install of fds it states that such a key can be requested at <http://renegadeserver.westwood.com>

now, this server seems to be down...

This is probably a result of the takeover by EA...

dedicated server going.

These codes don't work, they look like cd serials to me. So i think the'll work if you want to install the game, but not if youre trying to set up a WOL FDS.

did buy the game...
