Hi people...

Last time I played Renegade was almost a year ago... (Blame Battlefield 1942) So is there anything new? interesting mods? Was c&c_glacier ever finished? etc....

Is this the forum where I can find the "old" westwood-forum-humanoids?

I see some names I know from the "good" old days

Well considering that BF1942 came out 5 months ago, I find that hard to believe.

Renegade is just over a year old, and BF came after it. And if you played online, the autoupdate for version mismatches for Glacier would have told you this info already.

Go back to BF1942.
