I have a server running, I think, I am useing the FDS.
I think it is called test server. Could someone tell me if it is running...

I have completed my test of my server.
It runs "okay" at 10 players, but much better at 8, so that is what I am going to have it set at.

Tomorrow I will put it up again, but it will no longer be a test server, by that time I will come up with a name, and what ever else I feel like.

My server will strongly support fan-made-maps; post here the fan maps you would like to see.

If you have a map that you have made, and would like it on the server, PM me with your request.
