Hey,

I'm making a cutsom SAM site, and I'm in the commando stage. Im at the part where you set up
the little blue box and re-position havoc, (the transitions part). I made it so I have a custom SAM
model, instead of the WW ones. But when I do this, the blue box and havoc character are not
there. How do I get them back?

Please reply in the thread with your thoughts. Thanks man.

We have made great progress, with a few vehicle and weapon models done. We will post sometime next week, when our website is up and running.

i got a website layout that i created and haven't used for anything.

Both were going to be for a NOVA Mod Team, but they hired a professional to do it for them, so these are now up for grabs.

Take your pic:

Layout Number 1:

Layout Number 2:

NOTE:
If anyone steals/edits/pass them off as their own, i will file a laysuit on your ass and turn into a nasty person who you wished you would have never crossed.

The RenEvo Epoch layout is cool too. You have done a great job on the design, should look great when it is up and running. As for the blue boxes, jusp press a few buttons, you'll soon find it, it normally is at it's default position when you add new transition though.

Wow, nice layout, Madtone!

We'll see what Ohmybad comes up with, then we'll go from there.
