crap, crap, crap, and more crap

lol, jk

looks cool and weird at the same time

good job, i think

Do you have one of those for GDI also? Because I noticed on the front of it it had a Nod Symbol.
and also thats pretty good.

Ive added an alternatively textured version of the model in the same thread. It is the original model
I made which was retextured into a jungle style. For a GDI bunker, simply change the texture on
the front of the jungle style bunker.

I'll probably start work on some more models like this if you like them.

My next one will be for GDI hopefully.
